

HARSHIT KUMAR SHRIVASTAVA

AI/ML Engineer | Data Analyst | Applied AI | Computer Vision | LLM Systems

Durg, Chhattisgarh 491001 | +91-7000873227 | harshityuvraj10@gmail.com | [LinkedIn](#): linkedin.com/in/harshit-shrivastava-9042b3218 | [GitHub](#): github.com/BenTennyson100

PROFESSIONAL SUMMARY

Final-year BTech (AI and ML) engineer with 18+ months of internship experience building production-ready AI systems, from multi-agent LLM platforms and real-time computer vision pipelines to full-stack marketing features and business intelligence dashboards. Currently leading software development for SuperAGI's Marketing Pod, where I delivered the WhatsApp Test Button and subscribe/unsubscribe flows, and was ranked #1 in the Feb 2026 company-wide Bug Bash. Proven ability to own features end-to-end, ship in fast-paced product teams, and communicate technical outcomes clearly to stakeholders. Targeting full-time roles in AI/ML Engineering, Data Science, or Applied AI.

EDUCATION

Bachelor of Technology - Computer Science Engineering (AI and ML)

Expected May 2026

Jain University FET, Bangalore, Karnataka | CGPA: 8.2

Relevant Coursework: Data Structures, Algorithms, OOPs, DBMS, Machine Learning, Deep Learning, NLP, OS

Class XII (CBSE) - MGM Senior Secondary School, Bhilai, Chhattisgarh

2022 | 74%

SKILLS

Languages: Python (Proficient), Java (Basic), GoLang (Basic), Ruby on Rails (Basic)

AI and ML: TensorFlow, PyTorch, Scikit-learn, LangChain, LangGraph, RAG, Prompt Engineering, Large Language Models (LLMs), Natural Language Processing (NLP), Generative AI, OpenCV

Data and Viz: Pandas, NumPy, Power BI, Tableau, SQL

Databases: MySQL, MongoDB, FAISS, Pinecone, Vector Databases

Cloud and DevOps: AWS (S3, EC2, Lambda, SNS), Google Cloud Platform (GCP), Git, REST APIs, API Integration

Frameworks: Django, Node.js, Streamlit, Jupyter Notebooks

Concepts: RAG Pipelines, Multi-Agent Systems, Model Context Protocol (MCP), ETL, A/B Testing, SDLC, Computer Vision

Soft Skills: Problem Solving, Communication, Teamwork, Analytical Thinking

WORK EXPERIENCE

Software Development Engineering Intern

Jan 2026 - Present

SuperAGI, Bangalore

- Led software development for SuperAGI's **Marketing Pod**, owning end-to-end feature delivery for the marketing campaigns module of the platform.
- Designed and delivered a production-ready **WhatsApp Test Button** for marketing campaigns, enabling marketers to preview and validate message templates before live sends, reducing campaign errors at source.
- Built the **WhatsApp and Email subscribe/unsubscribe** system end-to-end, covering opt-in/opt-out flows, compliance logic, and user preference management across marketing campaigns.
- Ranked #1 in the Feb 2026 company-wide Bug Bash**, resolving the highest number of bugs that month and demonstrating deep codebase ownership and systematic debugging discipline.

Artificial Intelligence Intern

Aug 2025 - Nov 2025

Assisto Technologies Pvt. Ltd., Bangalore

- Engineered a production-grade multi-agent AI assistant platform integrating Model Context Protocol (MCP) with dynamic LLM routing across Qwen-series models, improving query accuracy and response efficiency.
- Built intelligent retrieval systems using MongoDB, JSONL datasets, and custom retrievers, combining database lookups with LLM reasoning for real-time contextual query answering with persistent chat memory.
- Developed and deployed modular AI pipelines using LangChain, LangGraph, and Ollama, delivering translation agents, a ball-tracking machine learning workflow, and a rental platform prototype with scalable context management.

Computer Vision Intern

Feb 2025 - May 2025

Six Phrase (Veranda), Bangalore

- Built a real-time ball tracking system in Python and OpenCV, combining object detection and trajectory estimation to deliver frame-by-frame positional analysis on live video feeds.
- Architected modular computer vision pipelines with clean separation of detection, tracking, and output stages, enabling new sports or camera configurations to be onboarded without core rewrites.

Data Analyst Intern

Apr 2024 - Jun 2024

Futureense Technologies, Bangalore

- Analyzed 20,000+ records using Python and SQL to extract actionable insights and identify key performance trends across business datasets.
- Built interactive **Power BI dashboards** and delivered data-driven recommendations that improved user metrics by 15%.

PROJECTS

AR-Aura - Augmented Reality Application | [AR-Aura](#)

- Built an interactive augmented reality application using Unity, C#, and Vuforia enabling users to draw and interact with virtual objects overlaid on real-world environments via device camera.
- Trained AR models with preprocessing techniques for seamless real-time object overlay and environmental interaction.

RAG-ChatBot - Context-Aware Retrieval Chatbot | [RAG-ChatBot](#)

- Developed a context-aware chatbot using LangChain, OpenAI API, and Hugging Face, combining semantic search and document indexing for accurate, grounded responses.
- Integrated local and remote Large Language Models (LLMs) with retrieval-augmented generation (RAG) prompting to improve answer quality over standalone LLM responses.

PUBLICATIONS

Shrivastava, H. K., and Sahu, S. "*Cricket Augmented Reality Training Application (C.A.R.T.A.)*". ICONS 2024, Jain School of Sciences, Bangalore, 2024.

EXTRACURRICULAR ACTIVITIES

- Member and Host, Orators Club, Jain University FET - Hosted Annual Fest Infinity 2K25.
- State-Level Cricketer - Represented Chhattisgarh in inter-state cricket tournaments.
